Circulation Research

VOLUME 57 JULY-DECEMBER 1985

VOLUME SUBJECT INDEX

A

ACTH: *see* Adrenocorticotropic hormone
Action potentials
  cardiac, modification, lidocaine and, 354
  cardiac Purkinje fibers, 35
  intracellular sodium activity and, lidocaine, 578
  overdrive suppression, ventricular, 517
  propagation, left ventricle/Purkinje muscle coupling, 252
  regional, ventricular, 362
Active transport, albumin, 903
Adenosine
  cerebral circulation and, 545
  coronary response to, 538
  ventricular overdrive suppression, heart and Purkinje fibers, 517
Adenosine triphosphate, reduction, cardiac myocytes, 640
Adenosine triphosphatase, myosin, heterogeneity of, heart, 406
Adenylate cyclase, pertussis toxin effects, atrium, 748
Adrenal cells, atriopeptins in, 113
Adrenal gland, catecholamines, hypertension and, 889
β-Adrenergic agonists, regulation, heart cells, 171
α-Adrenergic receptors
  myocardial necrosis and, 912
  neuronal regulation, heart cells, 415
  phosphoinositide hydrolysis, cardiac myocytes, 532
β-Adrenergic receptors
  impaired energy metabolism and, cardiac myocytes, 640
  kidney, 275
Adrenergic responses, myocardial, 912
Adrenoceptors, postjunctional, norepinephrine effects, 399
α_1-Adrenoceptors, sodium retention, renal nerve stimulation and, 304
Adrenocorticotropic hormone, atriopeptin and, 113
Aequorin, calcium handling, hypertrophy, 836
Afferent renal nerve, reflex, renal artery stenosis and, 676
Afterdepolarization, delayed
  lidocaine and, 578
  ventricular muscle, streptozotocin-induced diabetes and, 28
Aging
  coronary vasodilator reserve and, 538
  isozymes and, cardiac development, 406
Albumin
  active transport, 903
  passage, rete mirabile, 74
  transport, convection and diffusion in, thoracic aorta, 856
Aldosterone, release, atriopeptin effects, 113
Allopurinol, oxygen radicals, ischemia and, 599
Aloxan diabetes, myocardial microne-crosis and, 912
American Heart Association, position on use of research animal, 330
Aminophylline, adenosine and, ventricular overdrive suppression, 517
Anatomic imaging, coronary artery stenosis, 341
Anesthesia, renal sympathetic baroreflex, 618
Anesthetics, local, negative actions, 578
Angiogenesis, thyroxine-induced ventricular hypertrophy, 591
Angioplasty, balloon, 105
Angiotensin-converting enzyme, activity, retraction of article, 646
Angiotensin-converting enzyme inhibitor, myocardial infarction and, 84
Angiotensin II
  coronary artery response, 46
  neutrophil chemoattractant activity and, endothelial cells, 898
  pressor reactivity to, cirrhosis, 424
Anion channel, blockade, prostaglandin synthesis and, brain, 142
Anisotropic conduction, rate-related disturbances, cardiac Purkinje fibers, 35
Antiarrhythmic agent
  class I, lidocaine and, 578
  modification of $\dot{V}_{max}$, cardiac Purkinje fibers, 354
Aprotinin, cerebral circulation and, 545
Arachidonic acid, prostaglandin synthesis and, brain, 142
Arrhythmias
  lidocaine and, 578
  myocardial ischemia, 668
  ventricular, reentrant, myocardial infarction period, 432
Arterial baroreceptors
  hemorrhage effects, renal nerve activity, 788
  renal, anesthesia and, 618
Arterial pressure, static exercise, microneurographic studies, 461
Arteries: *see also* specific artery
  postjunctional adrenoceptors, norepinephrine effects, 399
Arteriography, quantitative, coronary artery stenosis, 341
Atherosclerosis
  experimental, smooth muscle growth, hypertension, 695
  fatty acid effects, low density lipoprotein, 776
Atrial natriuretic factor, norepinephrine-induced hypertension and, 470
Atrial natriuretic peptide, systemic and renal hemodynamics, anesthesia and, 634
Atriopeptins, adrenal cells, 113
Atrioventricular junction, recovery time, 182
Atrioventricular node cells, potassium and sodium current in, 65
Atrium, muscles, myosin diversity in, 767
Atropine, denervation supersensitivity and, 55
Autoradiography, β-adrenergic receptor localization, kidney, 275
Autoregulation, pulmonary arterial pressure-flow relations, 198
Awake state
  myocardial blood flow, heterogeneity of, 285
  renal sympathetic baroreflex, 618

B

Balloon angioplasty, 105
Baroreceptors, reflex control, 198
Baroreflexes
  angiotensin reactivity, cirrhosis, 424
  cardiopulmonary, renal nerves, hypertension, 741
  resetting, anesthesia and, 618
Betaxolol, β-adrenergic receptor localization, 275
Blockade, α-adrenoceptor, sodium retention and, 304
Blood-brain barrier, transport across cerebral endothelium, 213
Blood flow
  cerebral
    kallikrein-kinin system in, 545
    prostanoids, newborn, 689
  coronary
    development, 538
    norepinephrine release and, cardiac tissue, 19
    reserve, stenosis, 341
  hepatic, fetal, 811
  myocardial
    heterogeneity of, 285
    regional, cardiac denervation and, 383
    vagal chemoreflex, stimulating pulmonary C-fibers, 450
  regional, diastolic distensibility and, myocardial ischemia, 822
  renal medulla, 657
Blood pressure
  atrial natriuretic factor, 470
  atrial natriuretic peptide effects, anesthesia and, 634
  regulation, renal artery stenosis and, 676
Bradycardia, pulmonary edema, 1
Bradykinin
  cerebral circulation and, 545

prostaglandin synthesis and, brain, 142

C

Cardiac output, captopril effects, 84
Calcium
  metabolism, impaired, diabetes and, 28
  oscillations, low sodium perfusion and, 876
  smooth muscle structure and function, 497
Calcium channel blocker, brainstem, heart rate response to, 244
Calcium indicators, hypertrophy, 836
Calcium ions
  binding, myocardial contraction and, 374
  spontaneous oscillations, heart muscle and myocytes, 844
Capillaries
  cerebral, anthrocytes and cytochemistry, 213
  formation, protamine, 393
  recruitment, brain, 213
Capillary density, thyroxine-induced hypertrophy, 591
Capsaicin, coronary vasodilation, lung C-fibers and, 450
Captopril
  angiotensin II and, cirrhosis, 424
  infarcted left ventricle, 84
Cardiac activation, left ventricle/Purkinje muscle coupling, 252
Cardiac cells: *see* Heart cells
Cardiac denervation
  hemorrhage effects, renal nerve, 788
  with myocardial ischemia, 383
Cardiac development
  isozyme heterogeneity and, 406
  protamine effects, 393
Cardiac muscle
  hypertrophy, calcium handling in, 836
  spontaneous calcium oscillations, 844
Cardiac output
  atrial natriuretic peptide effects, anesthesia and, 634
  fetal, 811
Cardiac receptors, anesthesia and, 618
Cardiogenesis, ventricular trabeculations and, embryo heart, 759
Cardiomyocytes, phosphoinositide hydrolysis, adrenergic and cholinergic stimulation of, 532
Cardiomyopathies, myosins and, 729
Catalase
  cerebral arteriolar dilation, acute hypertension and, 787
  oxygen radicals, ischemia and, 599
Catecholamines
  adrenal, synthesis, hypertension and, 889
  α-adrenergic receptor, heart cells, 415
Catheter, balloon-tipped, coronary artery repsonse to 5-hydroxytryptamine, 46
Central command, microneurographic study, 461
Cerebral arteries, hypertensive, myogenic depolarization in, 319
Cerebral blood flow
  kallikrein-kinin system in, 545
  prostanoids, newborn, 689
Cerebral endothelium, blood-brain barrier, 213
Cerebral microcirculation
  anthrocytes and cytochemistry, 213
  kallikrein-kinin system in, 545
  oxygen radicals, vascular injury and, 508
  superoxide and, acute hypertension, 787
  superoxide anion radical, 142
Cerebrospinal fluid, prostanoids in, newborn, 689
Chemoreflex
  pulmonary, coronary vasodilation and, 450
  serotonin-induced, hypotension and, 262
Chemotaxis, angiotensin and, endothelial cells, 898
Chloride, passage, rete mirabile, 74
Chromatography, immunoaffinity, renin, vascular endothelial cells, 312
Chronotropy, α-adrenergic receptor, heart cells, 415
Cirrhosis, angiotensin II, pressor reactivity to, 424
Collagen, myocardial, scar tissue and, 562
Complement C_1, first component of, ischemic heart muscle, 119
Convection, albumin transport, thoracic aorta, 856
Coronary artery
  angiotensin II, 46
  heterogeneity of mycoardial blood flow, 285
  5-hydroxytryptamine and, 46
  occlusion, cardiac denervation in, 383
  pressure-flow relations, coronary bed and, 482
Coronary blood flow
  development, 538
  norepinephrine release and, cardiac tissues, 19
  reserve, stenosis, 341
Coronary reserve, thyroxine-induced hypertrophy, 591
Coronary spasm, prostaglandins and, 223
Coronary stenosis
  afterload, right ventricular function and, 96
  quantification, 341
Corticotropin, atriopeptin and, 113
Countercurrent exchange, renal medulla, 657
Current
  inward, voltage clamp recorded, 482
  transient outward, atrioventricular node cells, 65
Cyclic adenosine monophosphate, arrhythmias and, 668
Cyclic guanosine monophosphate, sodium-potassium pump, relaxation and, vascualr smooth muscle, 164
Cytoskeleton, β-adrenergic receptor regulation, heart cells, 171

D

Desensitization
  β-adrenergic receptor regulation, heart cells, 171
  diacylglycerol-mediated, cardiac β-adrenergic receptors, 443
Desipramine, norepinephrine uptake and, heart rate effects, 19
Dextran sulfate
  passage, rete mirabile, 74
  serotonin-induced chemoreflex, hypotension and, 262
Diabetes
  alloxan, myocardial micronecrosis, 912
  mRNA and, heart, 296
  streptozotocin-induced, delayed afterdepolarization in ventricular muscle and, 28
Diacylglycerol, desensitization, cardiac β-adrenergic receptors, 443
Diastole, high energy phosphates, pH, and blood flow relations, ischemic myocardium, 822
Diffusion, albumin transport and, thoracic aorta, 856
Diltiazem, brainstem, heart rate response to, 244
Dimethyl sulfoxide, ischemia and, skeletal muscle, 599
Dopamine, peripheral, spontaneous hypertension and, 889
Drugs: *see* specific type
Ductus venosus, flow, fetal, 811

E

ECG, action potentials, ventricular, 362
Echo amplitudes, reperfused myocardial infarcts and, 718
Electron microscopy
  balloon angioplasty, 105
  coronary artery, 46
  enhanced myocardial intensities, reperfused infarcts, 718
  smooth muscle structure and function, 497
  transmission, smooth muscle growth in hypertension, 695
  ventricular trabeculations, muscular septal development and, embryo heart, 759
Electron probe, X-ray microanalysis, smooth muscle, 497
Endothelial cells
  neutrophil chemoattractant activity, angiotensin and, 898
  vascular, renin expression, 312
Endothelial-dependent relaxation, leukotriene D_4, 323
Endothelial injury, non-denuding, hypertension and, 695
Endothelium: *see also* specific type
  albumin transport, 903
  coronary, hemodynamics during phenylephrine infusion, 46
  low density lipoprotein, fatty acid effects, 776
End systole, ventricular pacing effects, 706
Energy metabolism, impaired, cardiac myocytes, 640
Epinephrine, excretion, hypertension and, 889
Excitation-contraction coupling, smooth muscle, 497
Exercise, static, heart rate in microneurogenic studies, 461

F

Fatty acids
  arachidonic acid, prostaglandin synthesis and, brain, 142
  low density lipoprotein and, endothe-

lial monolayers, 776
myocardial metabolism, 232
Ferrocyanide, passage, rete mirabile, 74
Fetus, blood flow, 811
Finite strains, transmural myocardial deformation, 152
Fluorography, quantitative, mRNA, heart, 296
Forskolin, cyclic adenosine monophosphate and, arrhythmias, 668
Frank Starling mechanism, myocardial infarction, captopril in, 84

G

George E. Brown Memorial Lecture, 508
Glomerular filtration rate, natriuresis effects, anesthesia and, 634
Glucose, influx, brain, blood flow and, 213
Gracilis muscle, oxygen radicals, ischemia and, 599

H

Handgrip, microneurographic studies, 461
Heart cells
α-adrenergic chronotropic response, neuronal regulation of, 415
embryonic, β-adrenergic receptor regulation, 171
membrane currents, pH effects, 553
Heart rate
modulation of neurally released epinephrine, cardiac tissue, 19
static exercise, microneurographic studies, 461
Hemodynamic changes, pulmonary artery banding, 96
Hemodynamics, myocardial, myosins and, 729
Hemorrhage, renal nerve activity and, 788
Heparin, protamine effects, capillary formation, 393
Histamine, ischemia and, skeletal muscle, 599
Hydrogen peroxide, hydroxyl radical, cerebral vascular injury, 508
Hydroxyproline, myocardial, scar tissue and, 562
5-Hydroxytryptamine, coronary artery responses to, 46
Hyperplasia, mesenteric resistance, hypertension and, 794
Hypertension
cardiac hypertrophy, sodium in, 610
cerebral arteriolar dilation, superoxide and, 787
enhanced myogenic depolarization in, 319
intracranial, pulmonary edema, 1
oxygen radicals and, 508
renal, cardiopulmonary baroreflex control of, 741
smooth muscle growth in, 695
spontaneous
dopamine synthesis and, 889
resistance vessel, hyperplasia in, 794
two-kidney, one-clip Goldblatt, renal artery stenosis and, 676
Hypertrophy
calcium handling in, 836
cardiac
hypertensive, sodium in, 610
myosins and, 729
mesenteric resistance, hypertension and, 794
ventricular, thyroxine-induced, 591
Hypotension, serotonin-induced chemoreflex, 262
Hypothalamus, pulmonary edema, 1
Hypothyroidism, mRNA and, heart, 296
Hypoxia, adenosine, ventricular overdrive suppression and, 517

I

Imaging, anatomic, 341
Immunoaffinity chromatography, renin, vascular endothelial cells, 312
Immunofluorescence
myosin diversity, atrial muscles, 767
renin, vascular endothelial cells, 312
Indomethacin
cerebral circulation and, 545
chemoattractant generation and, endothelial cells, 898
Infarction
left ventricle, captopril effects, 84
myocardial: *see* Myocardial infarction
sub-acute, reentrant ventricular arrhythmias in, 432
Inositol, smooth muscle structure and function, 497
Inulin, passage, rete mirabile, 74
Iodide, passage, rete mirabile, 74
Ionic selectivity, sodium and potassium channel, atrioventricular node cells, 65
Ischemia
myocardial: *see* Myocardial ischemia
refractoriness and reentry, 432
Ischemic injury, complement and leukocytes in, 119
Isogravimetric capillary pressure, oxygen radicals, ischemia and, 599
Isozymes, heterogeneity of, heart, 406

K

Kallikrein, cerebral circulation and, 545
Kidney, nerve stimulation, sodium retention and, 304
Kininogen, cerebral circulation and, 545
Krogh tissue, protamine effects, capillary formation, 393

L

Letter to the Editor
baroreceptor reflex control, 198
canine left ventricle, 909, 911
diastolic coronary artery pressure-flow relations, 482
maximal upstroke velocity, 192, 482
myocardial micronecrosis, 912
Leukotriene D_4, relaxation of mesenteric arteries, 323
Lidocaine, negative actions, 578
Lipoproteins, low density, fatty acid effects, endothelium, 776
Lipoxygenase inhibitor, myocardial salvage, 131
Lung C-fibers, coronary vasodilation and, 450

M

Macromolecule transport, thoracic aorta, 856
Meclofenamate, angiotensin II and, cirrhosis, 424
Meclofenamic acid, cerebral circulation and, 545
Medulla, pulmonary edema, 1
Membrane potential, hypertensive cerebral arterial muscle, 319
Mesenteric artery, leukotriene D_4 and, 323
Methacholine, denervation supersensitivity and, 55
3-*O*-Methylglucose, passage, rete mirabile, 74
Microcirculation, renal medulla, 657
Microembolization, myocardial necrosis and, 912
Micropore filter, active transport, albumin, 903
Microspheres
fetal blood flow, 811
radioactive, cardiac denervation, myocardial ischemia, 383
tracer-labeled, myocardial blood flow, 285
Models
Goldblatt, hypertensive cardiac hypertrophy, 610
myocardial ischemia, 223
pulmonary arterial pressure-flow relations, 198
Monoclonal antibodies
modification of $\dot{V}_{max}$, cardiac Purkinje fibers, 354
myosin expression, atrial muscles, 767
Muscarinic cholinergic receptors, phosphoinositide hydrolysis, cardiac myocytes, 532
Muscarinic receptor, pertussis toxin effects, atrium, 748
Muscle afferents, sympathetic nerve responses, microneurographic study, 461
Myocardial blood flow
regional, cardiac denervation and, 383
vagal chemoreflex, stimulating pulmonary C-fibers, 450
Myocardial contraction, calcium ion binding and, 374
Myocardial energetics, low sodium perfusion and, 876
Myocardial, hemodynamics, myosins and, 729
Myocardial infarction
captopril and, 84
reperfusion, post-infarction scar tissue and, 562
size, enhanced echo intensities and, 718
Myocardial ischemia
arrhythmias during, cAMP and, 668
cardiac denervation and, 383
complement and leukocytes in, 119
diastolic distensibility, high energy phosphates, pH, and blood flow relations, 822
enhanced echo intensities, reperfused infarcts, 718
nafazatrom-induced salvage, 131
prostaglandin and thromboxane production, 223
volume regulation, plasma membrane injury and, 864
Myocardial metabolism, fatty acid, 232
Myocardial micronecrosis, 912

Myocardial osmolality, plasma membrane injury, 864
Myocardial perfusion, thyroxine-induced hypertrophy, 591
Myocytes
β-adrenergic receptors, phorbol ester and diacylglycerol-mediated desensitization, 443
impaired energy metabolism and, cardiac myocytes, 640
spontaneous calcium oscillations, 844
ventricular
phosphoinositide hydrolysis in, 532
potentials, 362
Myogenic transmural pressure, hypertensive cerebral arterial muscle, 319
Myosin ATPase, heterogeneity of, heart, 406
Myosins
cardiac hypertrophy and, 729
diversity, atrial muscles, 767

N

Nafazatrom, salvage, ischemic myocardium, 131
Nasopharyngeal reflex, anesthesia and, 618
Natriuresis, systemic and renal hemodynamics, anesthesia and, 634
Natriuretic factor, atrial, norepinephrine-induced hypertension and, 470
Neutrophils
chemoattractant activity, angiotensin and, endothelial cells, 898
function, nafazatrom and myocardial salvage, 131
Newborn, prostanoids, pial artery diameter and, 689
Norepinephrine
excretion, hypertension and, 889
heart rate modulation of, cardiac tissue, 19
hypertension, atrial natriuretic factor and, 470
neuronally released, postjunctional adrenoceptors and, 399
Nucleus tractus solitarii, calcium channel blocker effects, 244
Numerical simulation, left ventricle/Purkinje muscle coupling, 252

O

Osmotic cell swelling, myocardial ischemia and, 864
Osmotic reflection coefficient, oxygen radicals, ischemia and, 599
Ouabain, afterpolarization and triggered activity after, Purkinje fibers, 28
Overdrive suppression
determinants of, 182
ventricular, adenosine and, 517
Oxygen, consumption, myocardial, low sodium perfusion and, 876
Oxygen radical, cerebral arteriolar dilation, acute hypertension and, 787
Oxygen radical, ischemia, and catalase, 599

P

Pacing
atrial/ventricular, 182
rate-related suppression, cardiac Purkinje fibers, 35
ventricular, left ventricular end-systolic pressure-volume relation shifts, 706
[^{11}C]Palmitate, efflux of, myocardial, 232
Patch clamp, atrioventricular node cells, 65
Pericardium
mechanical properties, 475
stress-strain relations, 475
Pertussis toxin-sensitive substrate, hyperpolarization and, atrium, 748
pH
calcium binding and, myocardial contraction, 374
diastolic distensibility and, myocardial ischemia, 822
intracellular, membrane currents and, heart cells, 553
Pharmacology, microcirculation, renal medulla, 657
Phenylephrine, coronary artery response, 46
Phorbol esters, β-receptors and, heart, 443
Phosphates, high energy, diastolic distensibility and, myocardial ischemia, 822
Phosphatidylinositol, metabolism, ventricular myocytes, 532
Phospholipids, sarcolemmal, EC coupling, 374
Pial artery, diameter, prostanoids and, newborn, 689
Plasma membrane, injury, myocardial ischemia and, 864
Platelets
deposition, balloon angioplasty, 105
nafazatrom and myocardial salvage, 131
serotonin-induced chemoreflexes, 262
Polymorphonuclear leukocytes, complement and, ishcemic heart muscle, 119
Positron emission tomography, myocardial metabolism, 232
Potassium
aldosterone production, atriopeptin effects, 113
passage, rete mirabile, 74
Potassium channel, inward rectifier, ventricular cells, pH effects, 553
Potassium ion, conductance, atrial, pertussis toxin and, 748
Prazosin, renal nerve stimulation, sodium retention and, 304
Pregnenolone, atriopeptins and aldosterone, 113
Pressure-overload, hypertrophy, calcium handling in, 836
Pressure-volume relations, left ventricular, pacing effects, 706
Pretranslational control, cardiac mRNA, 296
Principal strains, transmural myocardial deformation, 152
Propranolol, norepinephrine uptake and, heart rate effects, 19
Prostaglandin, angiotensin II and, cirrhosis, 424
Prostaglandins
increased synthesis, cerebral extracellular space, 142
production, myocardial ischemia, 223
Prostanoids, pial artery diameter and, 689
Protamine, capillary formation and, 393
PS-product, blood flow and, brain, 213
Pulmonary arterial pressure-flow relations, autoregulation in, 198
Pulmonary artery
banding, hemodynamic changes, 96
endothelial cells, fatty acid effects on low density lipoprotein, 776
Pulmonary blood vessels, innervation, pulmonary edema, 1
Pulmonary C-fibers, stimulating, vagal chemoreflex, myocardial blood flow, 650
Pulmonary chemoreflex, coronary vasodilation and, 450
Pulmonary converting enzyme, activity, retraction of article, 646
Pulmonary edema, neurogenic, 1
Pulmonary microembolization, neurogenic pulmonary edema and, 1
Purkinje fibers
afterdepolarization, diabetes effects, 28
modification of $\dot{V}_{max}$, monoclonal antibodies, 354
rate-related conduction disturbances, 35
ventricular muscle activation and, 252
ventricular overdrive suppression, 517
Purkinje-ventricular junction, electrical coupling, 252
Pyrophosphate gel electrophoresis, isozymes, cardiac development and, 406

Q

Q-T interval, ventricular potentials, 362

R

Refractory maps, reentry and, ventricular arrhythmias, 432
Refractory period, effective, reentry and, 432
Renal artery, leukotriene D_4 and, 323
Renal medulla, microcirculation, 657
Renal nerve
activity, hemorrhage effects, 788
afferent, reflex, and renal artery stenosis, 676
stimulation, sodium retention and, 304
sympathetic baroreflex, anesthesia, 618
traffic, cardiopulmonary baroreflex control in hypertension, 741
Renin
β-adrenergic receptor localization, 275
vascular, 312
Renin-angiotensin system, hypertension, renal artery stenosis and, 676
Reperfusion
after coronary occlusion, effects on post-infarction scar tissue, 562
myocardium, enhanced echo intensities, 718
Research animals
use of, position of American Heart Association, 330
Resistance vessel, hypertensive, hyperplasia in, 794
Rete mirabile, passage of ions and dextran molecules, 74
Retraction, 646
Ribonucleic acid, messenger, diabetes effects, heart, 296
Rubidium, passage, rete mirabile, 74

Ryanodine, low sodium perfusion and, 876

S

Sarcolemma, phospholipid, EC coupling and, 374
Sarcoplasmic reticulum, spontaneous calcium oscillations, 844
Segmental shortening, transmural myocardial deformation, 152
Septal perfusion, myocardial blood flow, 285
Septum, muscular-ventricular, ventricular trabeculations and, embryo heart, 759
Serotonin, chemoreflexes, acute hypotension, 262
Shear strains, transmural myocardial deformation, 152
Single channel recording, atrioventricular node cells, 65
Sinus node, recovery time, 182
Skeletal muscle, vascular permeability, oxygen radicals and, 599
Smooth muscle
  structure and function, 497
  vascular
    atrial natriuretic factor and, 470
    leukotriene D_4 and, 323
    sodium-potassium pump, relaxation and cGMP, 164
Smooth muscle cells
  proliferation
    acute hypertension and, 695
    balloon angioplasty, 105
Sodium
  conductance, maximal upstroke velocity, 192
  hypertensive cardiac hypertrophy, 610
  intracellular, lodocaine and, 578
  low perfusion, systolic work and oxygen consumption during, 876
  passage, rete mirabile, 74
  retention, renal nerve stimulation and, 304
Sodium-calcium exchange, low sodium perfusion, 876
Sodium channel, modification of $\dot{V}_{max}$, cardiac Purkinje fibers, 354
Sodium-hydrogen exchange, membrane currents and, ventricular cells, 553
Sodium nitroprusside
  coronary response to, 538
  vascular smooth muscle, 164
Sodium-potassium pump, vascular smooth muscle and, 164
Sodium-water, excretion, atrial natriuretic factor, 470
Sonomicrometric technique, right ventricular function, 96
Spatial heterogeneity, myocardial blood flow, 285
Stress-strain relations, pericardium, 475
Stroke output, captopril effects, 84
Sulfate, passage, rete mirabile, 74
Superoxide, oxygen radicals, cerebral vascular injury, 508
Superoxide anion radical, cerebral extracellular space, 142
Superoxide dismutase
  cerebral arteriolar dilation, acute hypertension and, 787
  ischemia and, skeletal muscle, 599
Sympathetic amines, denervation supersensitivity to, 55
Sympathetic innervation, cardiac adrenergic responsiveness and, 415
Sympathetic nerve, activity, static exercise, microneurographic study, 461
Sympathetic nerves, hemorrhage effects, 788
Sympathetic nervous system
  calcium channel blockers and, brainstem, 244
  hypertension, renal artery stenosis and, 676
  hypertensive cardiac hypertrophy, sodium in, 610
Systolic work, low sodium perfusion and, 876

T

Temporal variations in flow, myocardial, 285
Terminal vascular bed, protamine effects, 393
Three-dimensional dissector, hypertension, hyperplasia and, 794
Thromboxane, production, myocardial ischemia, 223
Thrombus, balloon angioplasty, 105
Thyroid hormone, blood flow and, retal, 811
Tomography, positron emission, myocardial metabolism, 232
Transmural deformation, myocardial, left ventricle, 152
Transmural pressure, albumin transport, thoracic aorta, 856
Trisphosphate, smooth muscle structure and function, 497
Tropolone, platelet deposition, balloon angioplasty, 105

U

Ultrastructure, vasa recta, ascending and descending, 657
Upstroke velocity, maximal, sodium conductance, 192
Urea, passage, rete mirabile, 74
Urinary excretion, catecholamines, hypertension and, 889

V

Vagal afferents, cardiopulmonary baroreflex control, renal hypertension, 741
Vagotomy, bilateral, pulmonary edema, 1
Vasa recta, ascending and descending, ultrastructure, 657
Vascular reactivity, cirrhosis, angiotensin II and, 424
Vascular shunts, fetal, 811
Vascular waterfall, coronary pressure-flow relations, 482
Vasodilation
  coronary, pulmonary C-fiber stimulation, 450
  oxygen radicals, cerebral vessels and, 508
  renal, atriopeptin effects, 113
  superoxide and endothelium-dependent, 787
Vasodilator reserve, coronary, development, 538
Vasomotor responses, endogenous neurohumoral agents, 46
Vasopressin, antagonism, renal nerve stimulation and, 304
Veins, postjunctional adrenoceptors, norepinephrine effects, 399
Ventricle, adrenergic responsiveness, sympathetic innervation and, 415
Ventricle, left
  captopril therapy, 84
  end-systolic pressure-volume relation shifts, ventricular pacing effects, 706
  midwall, 909, 911
  Purkinje muscle coupling, 252
  transmural myocardial deformation, 152
Ventricle, right, shortening of free wall, afterload and, 96
Ventricular aneurysm, scar tissue, reperfusion effects, 562
Ventricular fibrillation, cyclic adenosine monophosphate and, 668
Ventricular function, mechanical properties of pericardium, 475
Ventricular pacing, left ventricular end-systolic pressure-volume relation shifts, 706
Ventricular rupture, scar tissue, reperfusion effects, 562
Ventricular tissue, potentials, 362
Ventricular trabecular formations, muscular septal development and, embryo heart, 759
Verapamil, brainstem, heart rate response to, 244
Videomicroscopy, microcirculation, renal medulla, 657
Visceral autonomic reflex, hypertension, renal artery stenosis and, 676
Viscoelasticity, mechanical properties of pericardium, 475
Voltage, maximum upstroke velocity, peak inward current and, 482
Voltage clamp
  measurement, sodium conductance, 192
  membrane currents, pH effects, heart cells, 553
Volume regulation, myocardial ischemia and, 864

W

Wall thickening, transmural myocardial deformation, 152
Water, passage, rete mirabile, 74

Z

Zinterol, β-adrenergic receptor localization, 275
